MaaT Pharma is a clinical-stage biotechnology company and industry leader in microbiome therapies in oncology, leveraging our whole ecosystem approach to develop biotherapies to treat serious diseases. We are implementing an innovative new medical approach focused on the gut microbiota as a source of drug candidates, leveraging our drug development expertise, our gutprint® computational biology platform and our biomanufacturing capabilities. Our pipeline consists of several drug candidates, the first of which is now in Phase 3 clinical testing.

We are driven by our pioneering spirit and are the first microbiome-derived drug development company listed in continental Europe, with an IPO on EURONEXT Paris in November 2021. We have a humanistic approach to our entrepreneurial adventure. Every recruitment is an opportunity to consolidate our rich and diverse human capital, which now exceeds more than 60 people.

Based in Lyon (69007), we are looking for a:

Data Engineer (M/F)
Internship
Position open to people with disabilities

Job Description

Reporting to the Data Steward, you will participate in the development of a data Lakehouse to enhance our scientific data and enable our data science team to build machine learning models.

The position is available as soon as possible for a period of 6 months.

Main responsibilities

- Participate in the development and feeling of a data lake ;
- Participate in the design and development of data pipelines, processing and analysis of clinical and metagenomic data ;
- Participate in the improvement of data infrastructure, including databases, storage systems and data flow management tools ;
- Participate in optimizing the performance of data processing systems ;
- Ensure data quality.

This position is central to our activities, supporting the development of our drug candidates, and offers the chance to engage with a demanding yet exciting industry.

Qualifications and Experience

- Bac +5 in process, in data engineering or data science ;
- Mastery of the Python language ;
- Knowledge of relational databases ;
- Knowledge of CI/CD and DevOps best practices ;
- Knowledge of Databricks is a plus ;
- Knowledge of Pandas, Py Spark or Polars libraries is a plus ;
- Ability to work in a team and independently ;
- Interest in the biotech sector and more specifically in microbiota.

You are an excellent communicator, flexible, dynamic, proactive, rigorous, and a team player—all qualities essential for this exciting opportunity.

Working at MaaT Pharma means joining a friendly, stimulating environment filled with challenges, within a passionate team, offering opportunities to develop your skills and grow.

If you are motivated about joining a dynamic and a human-sized team in an entrepreneurial and innovative environment, we would love to hear from you. Apply now by sending your resume and cover letter to careers@maat-pharma.com.
